

# FRONT-END DEVELOPER

JOB DESCRIPTION  
BOOKLET

# ABOUT THE JOB

Serendib Systems is a software development and digital marketing agency with teams in Australia and Sri Lanka. We operate with a startup culture that is open and collaborative. We have multiple global products that are used by thousands of users every day and we strive to improve them continuously. As a mobile/web developer, you will be working with these systems and see a direct impact of your work on our users. We're looking for an excellent team player who can work with minimal supervision and with extra care to design and usability.

# RESPONSIBILITIES

1. Utilize your expertise to develop and maintain mobile apps and websites that support tens of thousands of users.
2. Read and understand large code bases and improve them and/or add features without breaking functionality.
3. Collaborate with the team on resolving common issues and bugs.
4. Help make our products better for our users.

# QUALIFICATIONS

## Required

1. Bachelor's degree in Computer Science or similar technical field of study.
2. 1+ years experience in app development with ReactNative.
3. Experience in web development with ReactJS.
4. Good UI design/development skills.

# APPLY NOW!

If you think you are the one we are looking for, and are interested in becoming a part of this amazing company, please send your resume with the subject line “**Front-End Developer - Serendib Systems**” to the following email address:
